SUMMARY

Results-driven AI Automation Developer specializing in designing and deploying intelligent AI agents, conversational chatbots, and end-to-end business workflow automation. Skilled in Python, API integration, and n8n to build scalable automation solutions that streamline operations and reduce manual workload for businesses. Experienced in integrating Open AI and other LLMs into custom chatbots and automation pipelines, including WhatsApp and Telegram bot deployment. Proven ability to deliver client-focused solutions with fast turnaround, clear communication, and a strong focus on reliability and performance. Passionate about leveraging AI to solve real-world business problems and improve efficiency.

PROJECTS

Camera-Based Theft & Intruder Detection System

n8n Automation · AI Detection Workflow ·

- Built an n8n automation workflow that processes live camera input and flags intruder/ theft activity in real time.
- Designed the frontend in plain HTML, CSS and JavaScript to show live camera status and alerts.
- Configured instant alert notifications the moment suspicious activity is detected, removing manual monitoring.

AI Customer Support Chatbot (WhatsApp & Telegram)

n8n · OpenAI (ChatGPT) API · WhatsApp Cloud API · Telegram Bot API

- Built end-to-end AI chatbot workflows in n8n connecting WhatsApp and Telegram to OpenAI for instant customer replies.
- Designed conversation flows so the bot answers FAQs, qualifies leads, and hands off complex queries to a human.
- Delivered as a Fiverr gig service, onboarding and customizing the bot per client business requirements.

AI Business Automation Agent (Lead & Order Workflow)

n8n · OpenAI API · Google Sheets/CRM Nodes · REST Webhooks

- Automated a lead-to-order pipeline where incoming messages are parsed by an AI agent, classified, and logged automatically.
- Connected n8n to Google Sheets/CRM-style nodes so leads and orders sync without manual data entry.
- Replaced manual client follow-ups with AI-generated summaries and instant auto-replies.

EXPERIENCE

Freelance AI Automation & Chatbot Developer — Self-Employed

- Delivered multiple freelance projects through Fiverr and remote client work, specializing in AI chatbots and n8n automation workflows.
- Built custom AI agents and AI chatbots for clients, automating customer support, lead handling, and repetitive business tasks.
- Designed and deployed n8n workflows connecting AI agents to WhatsApp, Telegram, and other business tools.
- Integrated ChatGPT APIs to power intelligent, human-like conversation flows tailored to each client's business.
- Worked remotely with international clients — gathering requirements, planning automation solutions, and delivering end-to-end on schedule.
- Customized chatbot and automation features based on individual client needs, testing and refining workflows for reliability.
- Maintained clear communication with clients throughout each project, ensuring on-time delivery and client satisfaction.

TECHNICAL SKILLS

Workflow Automation

n8n Workflows · Webhooks · REST API Integration

AI & Chatbots

AI Agents · OpenAI API · LLM Integration · Claude API

Bot Platforms

WhatsApp Cloud API · Telegram Bot API · Meta Messenger API

Automation Tools

Google Sheets Integration · CRM Automation · Business Process Automation · Email Automation · Webhook Automation

Programming & Integration

Python · REST APIs · JSON · Webhooks · API Authentication · Git & GitHub

EDUCATION

Bachelor of Software Engineering, BSSE
Virtual University of Pakistan
2026- 2030 Lahore, Pakistan

Intermediate, ICS
Leadership Group of Colleges
2023 - 2025 Rohillanwali, Pakistan
